

WYCO TOOL

Division of Racine Federated Inc.

FOR IMMEDIATE RELEASE

January, 2010

Wyco Tool's Revolutionary Sure Speed™ Motor Produces Uniform & Repeatable Vibration – Every Time

Wyco Tool introduces the revolutionary Sure Speed™ Concrete Vibrator. The green, energy efficient Sure Speed motor produces uniform and repeatable vibration – every time, eliminating the guesswork. The user needs only one motor for any head and shaft combination.

Sure Speed meets the highest safety standards in the industry, UL60745 electrical certification and OSHA 29 CFR 1910.95 for noise decibels. Its lightweight, ergonomic design minimizes labor hours and fatigue. It's designed with a "soft start" which improves brush life, and its elimination of "over-speeding" out of mix saves wear.

Sure Speed's unique design controls vibrator speed and lowers the amount of concrete bleeding, reduces harmful loss of air entrainment, and concrete segregation due to over vibrating. Sure Speed allows the operator to be in control of the process by eliminating the speed variations inherent with existing vibrators affected by motor size, head size, and shaft length.

Wyco Tool's Sure Speed: one motor delivering uniform and repeatable vibration for the duration of the job.

Wyco Tool is a leading manufacturer of internal concrete vibration products, including handheld electric and portable gas-powered vibrators as well as hydraulic vibrators for paving machines. These products feature the exclusive Square Head™ vibrator head design for faster compaction, available in multiple head sizes.

Racine Federated is a privately held manufacturer of flow meters and internal concrete vibrators based in Racine, Wisconsin, USA. Products are sold under the following trade names: Blancett®, Dynasonics®, Flo-tech™, Hedland®, Preso®, Racine™ and Wyco®. For further information, see individual web site links at www.racinefed.com and www.wycotool.com for specific Wyco information.
