

# Square Head™ Backpack Concrete Vibrator

Lightweight, Portable and Full Powered

Utilizing a powerful two stroke engine, the 402BP is a full powered gas vibrator capable of powering any size Square Head at electric vibrator speeds. Designed with a diaphragm carburetor and no low oil shutoff, the operator is free to move about the jobsite. The backpack model also features a digital tachometer to supply the operator with engine speed and total operating hours. The cast aluminum housing contains direct drive hardened steel gears that doubles engine speed – no belts to slip, break or maintain.

## Model 402BP

- Runs up to speed in the mix
- Durable 40.2cc gas engine
- Compact and reliable gear increaser
- Heavy-duty clutch
- Swivel mounted, isolated frame
- Quick-disconnects for easy storage

**Backpack features allow the operator to match the vibrator speed with the mix.**

### A. Variable speed control

Operator can lock-in the proper maximum speed for Square Head size

### B. Visual readout

Digital tachometer indicates vibrator speed so operator can adjust vibration

### C. Speed increaser

Provides a positive mechanical drive, no slippage effecting head speeds
